¹ Guarantee required only when nutrient added except when the feed is intended, represented or serves as a principal source of the nutrient.

² Sodium guarantee required only when total sodium exceeds that furnished by the maximum salt guarantee.

Ingredients

Ingredients as defined by AAFCO.

Mixing Directions

Thoroughly mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of Type C medicated feed for ducks containing 200 – 400 grams chlortetracycline per ton.

The following table provides examples of mixing rates:

Type B CTC concentration (g/ton)	Type B per ton of Type C (lb)	Non-medicated feed per ton of Type C (lb)	Type C CTC concentration (g/ton)
10,000 (5 g/lb)	40	1960	200
10,000 (5 g/lb)	80	1920	400
40,000 (20 g/lb)	10	1990	200
40,000 (20 g/lb)	20	1980	400
80,000 (40 g/lb)	10	1990	400

The resulting Type C medicated feed should be fed continuously as the sole ration for not more than 21 days, to provide from 8 to 28 mg of chlortetracycline per pound of body weight per day depending upon age and severity of disease.

Warning

Do not feed to ducks producing eggs for human consumption.

Lot Number (if applicable): _____

MANUFACTURED BY

Blue Bird Feed Company
Robin, Indiana 11111

NET WEIGHT ON BAG OR BULK

* The final printed medicated feed label must state a single drug concentration.
